

ALWAYS COMFORTABLY RELIABLE

The Ruud® Achiever® Series Two-Stage Heat Pump

offers the solid technology and energy-saving performance you've come to expect from the Ruud brand. Let the quiet, reliable operation provide the next level of comfort for your entire family.

Ruud.com

Achiever® Series Heat Pump Model RP16

Cooling Efficiency: 16 SEER / 13 EER

Heating Efficiency: 9 HSPF

Two-Stage Technology is Advanced Comfort

Our two-stage heating and cooling design runs more quietly and efficiently than single-stage systems. By adapting to your home's changing conditions, it reduces energy usage and lower electric bills.

Outstanding Quality and Dependability

Our Achiever Series includes features that help fight corrosion, reduce leaks and enhance the overall strength of your heat pump. It's also backed by a 10-year parts warranty².

Bold Looks and Durability

Our modern cabinet design delivers smart details that not only look great, but also offer increased durability to protect your investment for years to come.

RELY ON RUUD.™

Our Philosophy of Innovation

We meticulously evaluated every detail of this product from every angle, considering the work that goes into installing and servicing our products, as well as how we can deliver the very best homeowner experience. And then we take it a step further. That's 360°+1. And that's why you can count on your heat pump to bring you and your family years of comfort.

Rely on Staying Comfortable in Every Season

A smart, efficient design makes the Ruud® Achiever® Series Heat Pump one of your best options for staying comfortable inside. Each new unit includes a generous list of features that work together to bring you quiet, efficient and dependable indoor comfort.

Smart and effective two-stage design makes the Achiever Series as quiet as it is efficient. While single-stage units must run at full capacity all the time, our two-stage system typically runs at just 65% capacity. This results in quieter operation and energy savings, while heating and cooling more gently and evenly. It also reduces humidity more effectively in warm weather.

A quieter and more durable unit starts with our smart new **composite base pan**. The design helps eliminate corrosion and adds to quieter performance. Extensive UV testing was done to ensure the base pan stays looking new for years to come. Our enhanced mufflers and improved refrigerant tubing design also contribute to quieter, more reliable operation. For added strength, **curved louver panels** and **rugged corner posts** on the exterior do an excellent job protecting the inside. And optimized reversing valve sizing helps extend the life of your system.

Curb appeal is not lost on our new Achiever Series. Our Heat Pumps look as good as they perform. Modern cabinet aesthetics allow your unit to put its best face forward, and a powder coat paint system provides a lasting, professional finish.

Quick and accurate installation and maintenance means your savings start with the installation of our new unit. Our Achiever Series Heat Pumps are built to go in fast and easy. The control box is also easy to access, and a roomy diagnostic service window means maintenance calls go quickly—saving you time and money.

Benefits At-A-Glance

Cooling Efficiency:

16 SEER / 13 EER

Heating Efficiency:

9 HSPF

Sound Level:

Features like our smart new composite base pan contribute to quieter operation.
